

# **Italian Mid/Small Caps Monthly**

# Mid-Cap Rebound Might Be the Prelude to 2024 Repositioning

by Intermonte Research Team

talian Equity Market

- Performance (+). The Italian equity market (prices as at 16 November 2023) has risen 3.3% in the last month and is up 21.3% YtD. The FTSE Italy Mid-Cap index (+6.5%) has outperformed the main index by 3.2% in the last month (-16.2% YtD on a relative basis), with the FTSE Italy Small Caps index (+2.3%) performing 1.0% below the market, or-28.5% on a relative basis since the beginning of 2023. Looking at mid/small cap performances across Europe, the MSCI Europe Small Caps index has increased 3.2% in the last month, performing worse than Italian mid-caps.
- Estimates (=). Since the beginning of 2023, we have implemented an +18.19% upward revision to our 2023 EPS estimates, with a more limited revision (+10.8%) to 2024 EPS; focusing on our mid/small cap coverage, however, we have raised 2023 EPS by a more moderate 5.1% since 1 January 2023. Notably, in the last month, we have not significantly changed our estimates for either FTSE MIB stocks (+1.1% on 2023 EPS) or our mid-cap coverage (-0.6%).
- Valuations (-). If we compare performance YtD to the change in FY23 estimates over the same period, we see that FTSE MIB stocks have recorded a 3.2% re-rating YtD (the same metric was -2.2% one month ago); mid-caps have de-rated by 3.5%, while small caps have re-rated by 17.8%. On a P/E basis, our panel is trading at a 31% premium to large caps, above the historical average premium (17%) and above the level one month ago (25%).
- Liquidity (+). Looking at official Italian index trends, we note that liquidity for large caps in the last month (measured by multiplying average volumes by average prices in a specific period) is 21.0% higher than in the corresponding period one year ago but is up just 5.5% from a YtD perspective. The picture is more worrying for mid/small caps: specifically, YtD liquidity is down 12.1% YoY for mid-caps and 16.9% YoY for small caps, even if improving in the last month, mainly thanks to an easy YoY comparison.
- Investment strategy. In the last month, Italian mid-caps have undergone a considerable rebound, once again driven by speculation on the fact that interest rate hikes should have come to an end. The extreme complexity of the macroeconomic picture may well prove to be a deterrent to an excessively restrictive monetary policy. In Italy, there seems limited room for manoeuvre in the Budget, meaning its potential content is likely to have little impact on stock markets. Elsewhere, 3Q23 results offered relatively comfortable indications, in many cases underlining the fundamental appeal of various companies albeit with some disappointments among industrials and consumers companies suffering from the ongoing economic slowdown. In this scenario, we advise increasing the weight of mid-cap stocks, especially those that offer good cash generation (consistent with "high for longer" interest rates). Despite their rebound, tech stocks still look appealing, along with a few utilities and some companies that can count on a significant order backlog. In terms of PIR flows, redemptions in the first 9 months exceeded Eu1.8bn and visibility on an inversion of the trend remains low. This situation should urge the government to allow investors to hold more than one personal savings plan (PIR).

# Liquidity

# Mid/small cap liquidity up in the last month

Looking at official Italian index trends, we note that liquidity for large caps in the last month (measured by multiplying average volumes by average prices in a specific period) is 21.0% higher than in the corresponding period one year ago but is up just 5.5% from a YtD perspective. The picture is more worrying for mid/small caps: specifically, YtD liquidity is down 12.1% YoY for mid-caps and 16.9% YoY for small caps, although it did improve in the last month, mainly thanks to an easy YoY comparison.

### Significant PIR outflows continued in September

In its quarterly review on 7 September 2023, Assogestioni released updated figures on 2Q23 PIR inflows. During the quarter, ordinary PIRs saw outflows of Eu610mn, while Alternative PIRs recorded inflows of Eu0.7mn. In terms of AuM, ordinary PIRs had Eu17.5bn under management, while Eu1.5bn was invested in alternative PIR funds.

According to *il Sole 24 Ore's* 'Osservatorio PIR' ('PIR Monitor'), outflows in July, August and September remained unsupportive and amounted to Eu169.4mn, Eu87.5mn and Eu163.4mn respectively, taking 3Q23 outflows to Eu420.3mn.

As a reminder, the features of PIR 3.0 are as follows: at least 70% of the fund must be invested in securities issued by listed Italian or EU companies having stable organisation in Italy; of this 70%, 25% (i.e. 17.5% of the total fund) must be invested in securities that are not on the main index (FTSE MIB in the case of Italian-listed stocks). The principal novelty in the new regulation is a mandatory minimum investment of 5% of the 70% (or 3.5% of the total fund) in small caps that are not listed on either the FTSEMIB or the FTSE MID indexes. This measure is likely to channel flows into a universe of small companies that are expected to obtain particular benefits from renewed investor interest. The new regulation also allows Italian pension funds to invest up to 10% of their assets in PIR funds. The fiscal benefit (unchanged) still relates to the elimination of capital gains tax after the investment is maintained in the fund for at least 5 years.

The Alternative PIR is a wrapper with tax benefits similar to PIR (i.e. tax exemption of capital gains for investments held for at least 5 years) and is capable of investing in ELTIFs, private equity funds or private debt funds. Because of the investments in illiquid assets (closer to the real economy but riskier), affluent investors are the target clients. The maximum investible amount per year is Eu300k per person (vs. Eu40k for PIR) up to a cumulative maximum of Eu1.5mn per person. Moreover, the concentration limit (i.e. max cumulative investment in a single stock) has been set at 20% (10% being the limit for regular PIR funds).

These alternative instruments are suitable for overcoming market volatility given their long-term commitment and are complementary to PIR funds in a broader sense (they are designed for semi-professional rather than retail investors).

#### **ALTERNATIVE PIR vs. PIR 3.0**

	PIR 3.0	Alternative PIR
Investor Target	Retail Investors	Semi-institutional investors
Main Investment Focus	Mid and Small Caps	Small and Micro Caps, Privately held SMEs
Type of Fund	Open-end Funds	Closed-End Funds, such as ELTIF, private equity funds, private debt funds
Max per capita investment	Eu40,000 a year (max Eu200,000)	Eu300,000 a year (max Eu1.5mn)
Concentration limit	Up to 10%	Up to 20%
Investment Criteria	At least 70% of the fund must be invested in securities issued by listed Italian or EU companies having stable organisation in Italy; of this 70%, 25% (i.e. 17.5% of the total fund) must be invested in securities that are not listed on the main index (FTSE MIB in the case of Italian-listed stocks) and 5% (or 3.5% of the total fund) in small caps that not listed on either the FTSEMIB or the FTSE MID indexes.	At least 70% of the fund must be invested in securities issued by Italian or EU companies having stable organisation in Italy that are small caps not listed on either the FTSEMIB or the FTSE MID indexes.
Fiscal benefits	Zeroing capital gains tax after maintaining the investment in the fund for at least 5 years	Zeroing capital gains tax after maintaining the investment in the fund for at least 5 years

### Confirming our estimates for ordinary PIRs, even though visibility remains low

Assogestioni data for 1H23 showed Eu1,425.4mn of outflows, and preliminary market data for 3Q23 (Eu-420.3mn) confirmed a similar negative trend. We remind that our estimates for the year, after a number of downward revisions, currently point to outflows of Eu1.9bn, assuming an improvement in numbers in 4Q23, on which visibility remains low.

Looking at the reasons for redemptions from PIR funds, we can certainly hypothesise that many investors, noting positive performances as they pass the 5-year mark for maintaining the investment (meaning that tax benefits on capital gains are retained), have decided to cash in their PIR funds, thus enabling them to invest their savings in other funds and markets.

According to the press, the Italian government is looking at an amendment to allow investors to hold more than one personal savings plan (PIR). The plan would cost the government no extra budget as the investment ceiling of Eu40k a year per person (or Eu200k over 5 years) would remain unchanged. We very much welcome this initiative: if approved, we think it could relaunch inflows to PIR funds, as the advantage of diversifying over several PIR products could increase investments by individual investors.

In the long term, we do expect that interest in this product will remain fairly high thanks to the fiscal benefit and, from a distributor point of view, to the fact that it can count on long-term commitment from investors.

The main assumptions underpinning our current estimates are as follows:

- for 2023, we assume gross inflows from new PIR subscribers of Eu120mn;
- For continuing subscribers, we expect that overall inflows in year two will amount to a portion of the sum set aside in the first year (from 35% to 40% in our model); in the remaining years (i.e. from the third to the fifth year) we expect stable inflows, equivalent on average to 50% of the investments made in the second year;
- Finally, we calculate the amount of capital that will be withdrawn by investors who decide to exit the fund at ~16% of assets under management in 2023.

#### PIR - Our assumptions

#### DISCLAIMER (for more details go to DISCLAIMER)

#### IMPORTANT DISCLOSURES

The reproduction of the information, recommendations and research produced by Intermonte SIM contained herein and of any its parts is strictly prohibited. None of the contents of this document may be shared with third parties without authorisation from Intermonte.

This report is directed exclusively at market professional and other institutional investors (Institutions) and is not for distribution to person other than "Institution" ("Non-Institution"), who should not rely on this material. Moreover, any investment or service to which this report may relate will not be made available to Non-Institution.

The information and data in this report have been obtained from sources which we believe to be reliable, although the accuracy of these cannot be guaranteed by Intermonte. In the event that there be any doubt as

to their reliability, this will be clearly indicated. The main purpose of the report is to offer up-to-date and accurate information in accordance with regulations in force covering "recommendations" and is not intended nor should it be construed as a solicitation to buy or sell securities.

This disclaimer is constantly updated on Intermonte's website www.intermonte.it under LEGAL INFORMATION. Valuations and recommendations can be found in the text of the most recent research and/or reports on the companies in question. For a list of all recommendations made by Intermonte on any financial instrument or issuer in the last twelve months consult the PERFORMANCE web page.

Intermonte distributes research and engages in other approved activities with respect to Major U.S. Institutional Investors ("Majors") and other Qualified Institutional Buyers ("QIBs"), in the United States, via Brasil Plural Securities LLC under SEC 15a-6 guidelines. Intermonte is not registered as a broker dealer in the United States under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and is not a member of the Securities Investor Protection Corporation ("SIPC"). Brasil Plural Securities LLC is registered as a broker-dealer under the Exchange Act and is a member of SIPC.

#### ANALYST CERTIFICATION

For each company mentioned in this report the respective research analyst hereby certifies that all of the views expressed in this research report accurately reflect the analyst's personal views about any or all of the

subject issuer (s) or securities. The analyst (s) also certify that no part of their compensation was, is or will be directly or indirectly related to the specific recommendation or view in this report.

The analyst (s) responsible for preparing this research report receive(s) compensation that is based upon various factors, including Intermonte's total profits, a portion of which is generated by Intermonte's corporate finance activities, although this is minimal in comparison to that generated by brokerage activities,

Intermonte's internal procedures and codes of conduct are aimed to ensure the impartiality of its financial analysts. The exchange of information between the Corporate Finance sector and the Research Department is prohibited, as is the exchange of information between the latter and the proprietary equity desk in order to prevent conflicts of interest when recommendations are made

#### **GUIDE TO FUNDAMENTAL RESEARCH**

The main methods used to evaluate financial instruments and set a target price for 12 months after the investment recommendation are as follows:

- Discounted cash flow (DCF) model or similar methods such as a dividend discount model (DDM)
- Comparison with market peers, using the most appropriate methods for the individual company analysed: among the main ratios used for industrial sectors are price/ earnings (P/E), EV/EBITDA, EV/EBITD, EV/EBITD, EV/EBITDA, EV/EBITDA, EV/EBITDA
- Return on capital and multiples of adjusted net book value are the main methods used for banking sector stocks, while for insurance sector stocks return on allocated capital and multiples on net book value and embedded portfolio value are used
- For the utilities sector comparisons are made between expected returns and the return on the regulatory asset base (RAB)

Some of the parameters used in evaluations, such as the risk-free rate and risk premium, are the same for all companies covered, and are updated to reflect market conditions. Currently a risk-free rate of 4.0% and a risk premium of 5.5% are being used.

Frequency of research: quarterly.

Reports on all companies listed on the S&PMIB40 Index, most of those on the MIDEX Index and the main small caps (regular coverage) are published at least once per quarter to comment on results and important

A draft copy of each report may be sent to the subject company for its information (without target price and/or recommendations), but unless expressly stated in the text of the report, no changes are made before it

Explanation of our ratings system:

BUY: stock expected to outperform the market by over 25% over a 12 month period;

OUTPERFORM: stock expected to outperform the market by between 10% and 25% over a 12 month period;

NEUTRAL: stock performance expected at between +10% and - 10% compared to the market over a 12 month period:

UNDERPERFORM: stock expected to underperform the market by between -10% and -25% over a 12 month period;

SELL: stock expected to underperform the market by over 25% over a 12 month period.

Prices: The prices reported in the research refer to the price at the close of the previous day of trading
